

MORCLEAN

AutoTruck Industrial Gantry Brush Wash Machines

Lorry Wash System

Morclean have now developed an Industrial Lorry Wash System that was designed to meet customer specifications and accommodate all their lorry washing needs. This system is available with two, three or five brushes depending on the customer's requirements. There is also the option of installing a hydraulic or pneumatic system.

Side High Pressure

Brush Wash System

A full range of auto brush wash and lorry wash systems are available. They can be built to the client's requirements and specification and the logic control circuits can be programmed around the vehicle fleet for varying artic or rigid sided fleets. Built from rigid galvanised frames the 2 brush or 3 brush roll-over units can be built in various combinations and layouts. A brush-less fixed or moving arch system can be built to specification for irregular shaped or sized vehicles. The system is manufactured and installed to suit all types of vehicles, wash combinations and sizes of fleet.

Cleaning for irregular shapes

All Morclean Brush Wash and Lorry Wash Systems can be used in conjunction with a Morclean Water Reclaim System. These cost effective systems collect waste water in an Interceptor and then recycle it for later use.
