

MORCLEAN

Maxi Robot Touchless Washing System - Commercial Vehicles

The Maxi Robot is a brushless system designed for cleaning irregular shaped vehicles. It works with high pressure (side and upper), and is ideal for washing Industrial vehicles with irregular shapes. This system is unique in that the water power is concentrated in a few nozzles to ensure an effective washing action through their rotating and alternating movement.

Standard Features

Washing Height: MT. 4.00
Washing Width: MT. 2.50
Hot galvanised structure with fairing in ABS or painted aluminium (optional: the structure can be galvanized and painted or in stainless steel)
