

# Ultra High-Pressure Water Jetters/Blasters

The Morclean Sitemaster range of Ultra High Pressure Water Blasters (engine and electric driven) are heavy duty, high performance machines designed for the professional, industrial user.

They are ideal for use in robust environments such as off shore, shipping, marine, building and construction, oil and gas, manufacturing, automotive, and power plants.

Electric Driven

This new range is designed not only to clean surfaces but also to blast off scale, grime, rust and graffiti as well as roughening and even cutting through concrete surfaces.

The water jetter machines will also remove algae off concrete constructions, paint, graffiti and rust off steel and concrete surfaces, dust, dirt, soil and mud off floors, oil & grease off engines and mechanical parts, dirt and salt deposits off ship decks, lime scale deposits and marine growth and cleaning construction machinery, equipment and scaffolding.

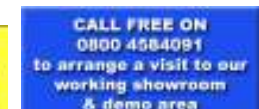

Engine Driven

The specifications of these machines are extremely varied and range from 250 Bar to 2500 Bar (3625 Psi to 36000 Psi), 16 L/min to 80 L/min and 15 Kw to 113 Kw ensuring that whatever your industry, or your application.....

**Morclean Ultra High Pressure Jetters provide the solution.**
