

MORCLEAN

Self Service & Multibay Car Washing

After extensive research and technical tests, we are now pleased to be able to offer the Multibay Car Wash. This is extremely reliable and offers a superb quality wash every time. It is cheap and ecological to run, and all the water is recycled. Listed below are the different models available with varying numbers of wash stations.

Penelope

This is a very unique, innovative and impressive design and great attention has been given to detail. It contains built in ceiling lamps, foldaway buttons panel into the bulkheads and a double wall which contains the columns.

Minerva

Versatile and elegant, it can be customised with a wide range of colours. The columns are covered with a pre-painted aluminium casing with a rounded shape and the ribs are covered with methacrylate ABS. It has a stainless steel buttons panel fixed to the ground with a stainless steel pedestal.

Multi Compact

This allows you to manage from 2 to 3 stations and is equipped with ASI technology. It is available either inside a cabinet or just on a stainless steel structure.

Multi Compact Box

This is available for 2 or 3 washing bays. It is supplied pre-assembled on a stainless steel base for installation inside an insulated box with sandwich panels.

Morclean also design and specify all civil works, interceptors, water reclaim and discharge and drainage. Our team of technicians will be pleased to offer all the necessary advice.

All Morclean Drive Through Vehicle Wash Systems can be used in conjunction with a Morclean Water Reclaim System. These cost effective systems collect waste water in an Interceptor and then recycle it for later use.
