

Morclean SSTT 1500 Fine Dust Vac

Features

- Kit BB5 included
- Designed to incorporate the most demanding of fine dust removal using 'Dual Chamber' technology.
- Capable of picking up large amounts of dust separating the very fine dust that normally binds and blocks filtration of standard vacuum.
- Especially suited to jobs where large volumes of fine dust are created.

Suitable Uses

The SSTT vac is suited to the bulk removal of dusts created by wall chasing, plaster dusts etc. and ideal for bulk removal of sand blasting grit where the separation of unwanted dust is required before recycling.

Limitations

This machine is not suitable for wet pick up or the removal of hazardous or volatile substances.

Specification
