

# TANKS

## BUNDED FUEL TANKS

### ECOSAFE

Morclean Bunded EcoSafe tanks represent the most advanced range of integrally bunded oil storage systems available within the EU. Designed to exceed all current oil storage regulations, the EcoSafe range is factory fitted with the Watchman Plus complete pro-active fuel monitoring system. The Watchman Plus not only monitors oil levels within the tank, but also acts as a bund safety sensor.

Specifically designed for commercial, industrial, institutional and agricultural properties where bunded tanks are now compulsory, the EcoSafe range is also becoming ever more popular amongst domestic users for its safe and environmental features. Fitted with the SpillStop overflow protective system, the EcoSafe is one of the most advanced and secure tanks on the market.
