

SERIES ST

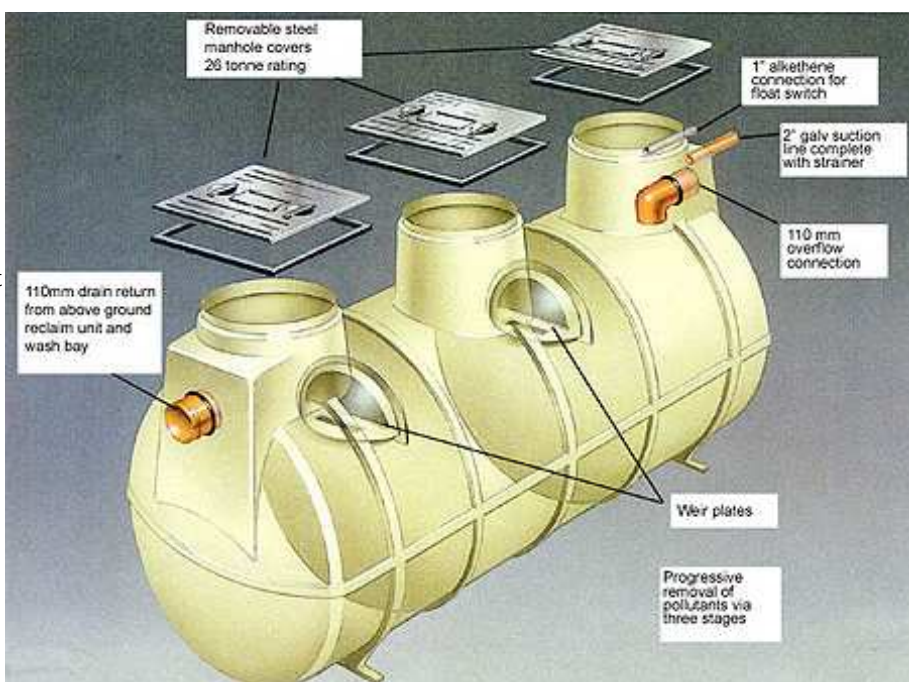

ST 3 Stage Vehicle Wash Water Inteceptor Tank

The essential part of any vehicle washing installation!

Considering installing vehicle washing facilities? Then consider the advantages of installing a 3 Stage interceptor tank. The ST system has been specifically designed for vehicle wash effluent and is extensively used throughout the transport industry

Benefits

- Reduces pollution
- Reduces effluent charges
- Prevents drain blockages
- Free oil removed
- Packaged one piece system including covers for fast, labour saving installation
- Connection of below ground pipework to connections, provided at time of installation, enables Water Recycling System to be fitted at a later date, then enables the user to effect very attractive savings in water and effluent charges, or to continue to use the vehicle wash in the event of a hose pipe ban due to water shortages.
- Incorporates 26 tonne manhole covers
- Can be placed within washbay or in forecourt area

SPECIFICATION

Model	Dimensions (external)	Weight (kg)		Water capacity (litres)	Usage
		Empty	Full		
ST2500	2870 x 1300 x 1620	218	2718	2500	Max 25 g/m
ST3250	3620 x 1300 x 1610	244	3494	3250	Max 35 g/m
ST6000	3300 x 1900 x 2185	Empty	Full	6000	Max 75 g/m
		468	6468		

Construction

The interceptor tanks are made of durable rot and corrosion proof glass reinforced polyester which combines light weight with outstanding strength.

Also available:

1. OS range of tilted plate oil interceptors
2. HC and GHD range of vehicle wash water recycling systems.
