

UK Type H Vacuum Cleaners For Hazardous Dust 2010

This range of Approved "H" series hazardous dust vacuum cleaners has been specifically designed for industries where it is necessary to remove dust that constitutes a health hazard to the operatives. The units meet the requirements of industries where the practical easy to use filters and accessories can be used and cleaned on a daily basis. The approved range of vacuums meet an absolute 99.997% filtration efficiency.

Our Technical Operators can advise the best use of each model and consideration to ensuring the most suitable model is chosen based on the volume of dust or material to be collected. A carefully selected accessory kit and efficient cleaning performance ensures hazardous and health endangering dusts can be correctly and safely collected and disposed.

Model	Description	Price
MV 10/1H	With 32 mm D11 tool kit	£404.00

UK Professional Duty Hot & Cold Water Extraction Carpet And Upholstery Cleaning Machines 2010

A full range of carpet and upholstery cleaners (called extraction machines) including valeting machines, carpet cleaners, upholstery cleaners etc. They are available in 240 or 110 volts. Combinations of 1 or 2 x 1000w motors, combination kits and accessories for various tasks are available.

There are 2 main categories of carpet / extraction machines. Firstly the Morclean commercial range of cylinder based extraction machines (please see the Commercial Price List) Conventionally these have an internal or externally mounted clean solution tank, and a recovery tank for the debris with a solution pump pressure of approx 2 bar and 1 or 2 x 1000w recovery motors with a standard cleaning kit. Secondly these heavy duty user 'Robin' machines are robustly constructed on a chassis with GRP fibre glass durable containers with a bonded zinc plated base frame for Contractors or the professional user. The main functional differences between these and the commercial duty machines is that the pump pressure is 50 psi developed by a 'Flojet' diaphragm pump fitted with by-pass valves and a fan cooled brush-less induction motor, they have a heavy duty and robust cleaning kit included, and they can be thermostatically heated for the cleaning of larger more heavily soiled areas

Capacity	Description	Price
15 Litre	Red Robin with 3 metre hose, main wand & hand tool	£884.00
20 Litre	Red Robin with 3 metre hose, main wand & hand tool	£896.00
