

## Dry Vacuum Cleaners

### Prima & Prima CD

Built without compromise the Prima and Prima CD are fitted with a powerful yet reliable twin fan motor offering years and years of faithful service. Built to a specification and not a price, these models will still be performing when others have long since taken early retirement. These models are moulded from resilient impact resistant plastics, which make them lightweight yet robust enough for use in the toughest environments.

Excellent manoeuvrability and stability is ensured by their four widely spread large twin wheel castors.

Both models have 10 metres of cable with a moulded on plug. The Prima CD has the extra advantage of a manually operated cable rewind mechanism.

These advance design features make these models especially suitable for schools, hotels, restaurants, contract cleaning, offices and public houses, yet they remain light and compact enough for use in the home.

#### Features
