

Streamflow

The streamflow range of bypass separators are designed for contaminated water run off for eg. Car Parks & Hard Standings.

Constructed from GRP they are available as a standard supply for areas between 833M² to 16666M². Morclean SF22222M² and above are available on request.

All Morclean's Streamflow range have 1 x 600mm access chamber so then when installed they are neatly concealed yet accessible under a standard 600mm cover.

**Due to the weights involved covers and lids are expensive to transport and often cost more to ship than they are worth so we advise you source your own. You can purchase covers and lids from most builders merchants.

All Streamflow separators require a mandatory alarm, supplied separately.

Specification and technical details are available on request.

** Also available from Morclean are Pumping Chambers, Silt Traps, Washbay Interceptors, Fuelsafe, Oilsafe and Above Ground Equipment.
