

Dosing System

The Morclean Dosing System is a free standing unit, where wall mounting is not practical or necessary. The unit contains the dosing system itself, dosing product and control panel.

Typically the Morclean dosing system is used for water conditioning or where the emulsification of oils needs to be split for subsequent removal. The dosing pumps are available with various dose capacities, pulses, timer and dosage amounts and are all built to order as a site specific device. The mounting plate can be fixed to any suitable floor and the unit requires an incoming, isolated power supply.

Fully compatible for the use with a range of Morclean Interceptors, please ask for more information.

Dimensions

A Control Box	Made to Order
B Dosing System	Made to Order
C Height (mm)	1250
D Detergent Container	25 litres
E Width (mm)	350
F Depth (mm)	350
